

ALEXANDER DE TORO TODOROV

Hi, I'm Alexander.

First-year Bioinformatics student interested in atomistic, physics-based simulations of biological systems for synthetic design.

EDUCATION

BSc in Bioinformatics (Barcelona)

2026 – present

Interuniversity degree, taught entirely in English, across four universities:

BarcelonaTech (Host)

Pompeu Fabra University

Barcelona University

Barcelona Autonomous University

Skills: Linear Algebra · NumPy (Python) · PyMOL · Fiji (Image Analysis)

Upper-secondary diploma, life sciences (Spanish Baccalaureate)

2024 – 2026

Final grade: 9.11/10. Instituto Radio Exterior, Alicante, Spain.

AWARDS & TALKS

Award of the Societat Catalana de Pedagogia (Exporecerca science fair)

Mar 2026

For the literature-review project “*Futuro y límites de la biología computacional: una revisión de alcance*” (Future and limits of Computational Biology: a scope review).

Invited speaker — III International Congress of the Societat Catalana de Pedagogia

May 2027

Talk granted as part of the award. Topic: computational biology and simulation as a route to studying phenomena such as learning and neuron/brain function.

PROJECTS

Disease Project (University)

2026 – ongoing

Protein structure analysis of disease variants and project planning.

Skills: PDB (Protein Structure Analysis) · Git and GitHub · Project planning (Gantt charts, risk analysis)

INVERSO Project (Personal)

2025 – ongoing

Personal project, website and media platform built to develop my skills, thoughts and experiences around Computational Biology. It involves essays, key questions and ethics reflections.

Skills: Web design and development (built www.inverso.bio).

Science communication, writing, video.

Entrepreneurship, networking, self-direction.

LANGUAGES

English Advanced (C1), Professional

Spanish Native, Professional

Catalan, Bulgarian Native, Conversational
